- Bachelor of Computer Science

Calicut University  
2017-2020

- Oxdu Tech School

Ramanattukara  
2023

## Profile

I am Shibila Sulthana, a qualified and professional web developer with a Bachelor of Computer Science. I have honed my skills through 6 months of intensive Python development coursework, complemented by a rewarding 2-month internship. Highly motivated and skilled in front-end technologies, I possess a strong background in Python, dedicated to delivering top-notch web applications with a focus on exceptional user experiences and optimal performance. My passion for innovation and commitment to excellence drive me to create impactful digital solutions that leave a lasting impression.

## Experience

### Gedexo Technologies

(11/2023 – Present)

Internship

- Develop and maintain Python-based web applications using Django.
- Implement responsive designs with HTML5, CSS3, and Bootstrap.
- Utilize Django Registration Redux for user authentication.
- Manage shopping cart functionality for seamless online transactions.
- Use Git for version control and collaborative development.
- Integrate Stripe for secure payment processing.
- Stay updated on the latest web development trends and technologies.

# Skills

**Front-end Development:** HTML, CSS, Bootstrap, JavaScript, jQuery

**Back-end Development:** Python (Django)

**Version Control:** Git, GitHub, Gitlab

---

## Projects

### Youtube Clone Project

Developed a feature-rich YouTube clone for an engaging user experience.

Key Features:

- Implemented secure **user authentication** system using Django Registration Redux
- Restricted subscription, watched history, and liking to logged-in users.
- Enabled users to **create channels** with names and profile picture.
- Integrated **video upload** functionality using Django and Associated it with respective channels.
- User **subscription** functionality to channels.
- Implemented a "subscriptions" page so users can see their subscribed channels.
- Added a **history feature** to show your recently watched videos.
- Included a **'like' button** for saving your favorite videos.
- Implemented a **trending page** for latest 6 videos by uploads.
- Developed a robust **view count** system for videos.
- Users can **download videos** for offline watching.
- User **feedback form** for suggestions and improvements. .
