Profile

I am Shibila Sulthana, a qualified and professional web developer with a Bachelor of Computer Science. I have honed my skills through 6 months of intensive Python development coursework, complemented by a rewarding 2-month internship. Highly motivated and skilled in front-end technologies, I possess a strong background in Python, dedicated to delivering top-notch web applications with a focus on exceptional user experiences and optimal performance. My passion for innovation and commitment to excellence drive me to create impactful digital solutions that leave a lasting impression.

Experience

- Proficient in HTML5, CSS3, JavaScript and other web technologies

- Experience with CSS frameworks such as Bootstrap
- Skilled in responsive web design and mobile optimization

- Ability to work with version control systems like Git

- Continuous learner, Keeping up with the latest trends and teachnologies in Web development

Skills

Front-end Development: HTML, CSS, Bootstrap, JavaScript, jQuery
Back-end Development: Python (Django)
Version Control: Git, GitHub

Projects

Youtube Home Page Clone Project

Developed an exciting web development project to recreate the visual design and layout of YouTube's website. Utilized HTML, CSS, and Bootstrap framework to mimic the familiar user interface of YouTube while ensuring a responsive and mobile-friendly experience.

Key Achievements:
- Successfully recreated the captivating look and layout of YouTube's website.
- Demonstrated foundational front-end development skills through meticulous structuring, elegant styling, and efficient use of Bootstrap components.
- Enhanced expertise in front-end web development by working on a hands-on project integrating modern web frameworks.

Technologies used: HTML, CSS, Bootstrap

Netflix Home Page Clone Project

Successfully replicated the design and layout of Netflix's home page using a combination of HTML, CSS, and the Bootstrap framework. This project involved creating a responsive and visually appealing user interface to closely mimic the Netflix website.

Key Features:
- Utilized HTML to structure the web page, ensuring a clear and organized layout.
- Employed CSS to style elements, matching the visual design of Netflix.
- Integrated Bootstrap components for a responsive and mobile-friendly user experience.
- Demonstrated skills in front-end web development, including design and responsiveness.

Technologies used: HTML, CSS, Bootstrap
